

# Oil eater

## Product Description

Hagmans Oljeätare (oil eater) is a gentle but powerful cleaning product consisting of a mixture of microbes that have been developed especially to break down oil remains.

## Range of applications

Hagmans Oljeätare (oil eater) is used before painting/treating cement floors. Decontaminates problematic oil spots gently and efficiently. N.B. Discolouration or oil can be difficult to remove.

## Technical data

Basic material: Mixture of microbes

Appearance: Transparent, liquid

pH value: 7-9

Density: approx. 1 kg/l

Pot life: 2 years when stored in a sealed container at room temperature.

## Application

Spray, brush or pour out Hagmans Oljeätare on those surfaces to be treated and scrub using a brush or paintbrush. Let the product take effect for approx. 20 min. For the best results scrub once more before rinsing with water. Numerous treatments may be necessary to remove the old oil, since oil seeps deep down into cement.

## Note:

Discoloration after oil stains can be difficult to remove, the oil disappears, making it possible to treat the floor. Take care when using on asphalt surfaces since the product may have a negative effect on the substrate. For further information, see the product's data sheet.

Pot life - 2 years.
