# NCS Album 2050

Arguably the most universal tool in the NCS Design Tools family. Perfect for design studios, architectural firms, marketing bureaus and other teams working continuously with colour design.

- The most comprehensive product out of the NCS Design Tools.
- The colours are represented by unmounted single A9 colour samples, allowing the user to work and interact efficiently with the NCS Album 2050.
- Perfect product for making interactive colour combinations or to visually inspect and define each individual colour, no matter what material or surface.

HOW THE COLOURS ARE ARRANGED

Each NCS 2050 Standard Colour is represented by colour samples that can be detached for comparison or used in mood boards etc., positioned in the NCS Album based on its relationship to the colours in nuance and hue.

- The NCS Album 2050 contains 80 pages of samples, two per hue.
- Each Hue contains up to 65 colours in different nuances, with 3 samples of each colour tucked into pockets on the page.
- The samples are organized based on the position of each colour in the NCS Colour Space.
- 5 Additional pages with neutral and tinted greys.
- The NCS Album 2050 is divided in two parts (albums). The first part with pure grey colours together with the hues Y-R90B. The second part with the hues B-G90Y. A practical storage box is included.

NCS
