

Decking Cleaner

Product description / Application:

Clean pressure-impregnated wood. The product is slightly thixotropic for a better duration of action. Removes discoloration, algae, dirt, coatings and residues of old wood oil on previously treated surfaces.

NOTE! Can etch glass, aluminum and other alkali-sensitive surfaces.

Technical information:

Base material: Surfactants, sodium hydroxide

Density: 1.02 kg / L

Material-use: Used undiluted about 15 m² / L

Shelf life: Frost-free 5 years

Preparation:

Remove leaves, twigs, etc. Protect sensitive surfaces and plants.

How to use / Application:

Wet the substrate with water and then apply the product with a hard brush of 2-3 m² at a time and let work for about 10 minutes, however, without allowing it to dry in. Process the surface with the brush and rinse thoroughly with high pressure washer. No residues of the detergent may be left in the treatment with wood oil. If necessary, repeat the treatment.

Other information:

Wear rubber gloves as well as safety goggles when carrying out and removing the product.

Packaging:

1L, 4L
