

Clean & Grip | VY0500

Field of application. Non-absorbent surfaces (metal, glass, plastic, PVC, ceramic, etc.).

Information. Clean & Grip is a cleaner and adhesion activator that releases reactive substances for anchoring multi-surface coatings, in particular those from the Decogrip, Vintage, Floor, and Golden Prestige ranges. Clean & Grip has a dual effect: it degreases the substrate and facilitates subsequent coating. Suitable for all non-absorbent surfaces, this 1K formula is based on oligomers in solution. It can be used both indoors and outdoors. It does not leave spots.

Instructions. Ensure that the surfaces to be treated are undamaged, dry, free of dust, grease, wax, rust, and old layers of peeling coating. Remove any residue and apply Clean & Grip evenly with a soft cloth. Wait at least 10 minutes. Once Clean & Grip has dried, apply the desired multi-surface coating within 6 hours. Given the variety of non-absorbent surfaces, it is recommended to conduct a preliminary test on a small portion of the surface to be treated with Clean & Grip.

Overcoating. Decogrip Solution RE20xx, Vintage Prestige RBxx90, Floor Prestige RB2x70 and Golden Prestige RB5x90.

Packaging. 0,75 L, 5 L

Storage
> 5°C

Painting
> 10°C

Ready to use

Wipe

Yield
20 m²/L

Final drying time
10 min

Specific weight
0,80 ± 0,10 g/cm³
